### Concerning the AIS Recording in the BlueOcean SVDR

The BlueOcean SVDR can record target data from an on board AIS.

The recording of the AIS data is according IEC61996-2 4.6.8. All target data are recorded in their original form in order to be able to test the fidelity of the recording: the comparison of the original and recorded data is straightforward and the surveyor can easily determine that the recording is error-free, in accordance to IEC61996-2 4.4.3, Recording Integrity, point c (bit error rate).

The player equipment is available to investigation authorities according to IEC61996-2 5.5.3 d. Note that the player equipment is not recommended to be freely available for security reasons. The decoding of the AIS data is according to IEC61993.

For COMAS Electronics
